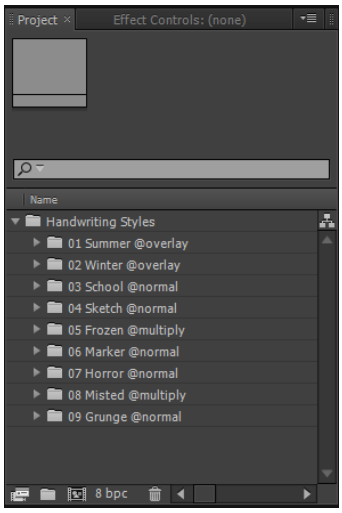
Animated Handwriting Bundle

Just type your text and get its animation!

First, please, copy **TypeSetter Script** *(TypeSetter.jsxbin)* to After Effects folder:
[After Effects path] **\Support Files\Scripts\ScriptUI Panels**

Also copy folder **Animated Handwriting Bundle** with 3 files of *animation presets: 01 Summer.ffx, 02 Winter.ffx* and *05 Frozen.ffx* to After Effects folder:
[After Effects path] **\Support Files\Presets**



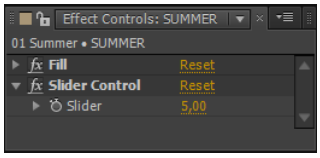
Then, open *After Effects project.* You will see **9 Handwriting Styles** in "Project" panel:
Summer – handwriting with finger or stick on the sand,
Winter – handwriting with finger or stick on the snow,
School – handwriting with chalk on a blackboard,
Sketch – handwriting with pencil on paper,
Frozen – handwriting with finger on the frozen window with *animation of freezing,*
Marker – handwriting with marker on paper or marker board,
Horror – handwriting in paint with *animation of flowing,*
Misted – handwriting with finger on misted-up window with *animation of fogging,*
Grunge – handwriting in paint with *animation of spreading and drops.*

Find **TypeSetter Script** in "Window" menu and open it. You have to **select handwriting style** in "Project" panel and to **press "Set typeface folder" button** in TypeSetter script panel. Next, **just type your text** and **select script options:**

Character Start Delay – delay between *previous* and *new character* animation *(0 – no delay, 1 – every new character will start after full animation of previous one)*
Character Size (%) – size of characters, i.e. *scale of text* in percents.
Tracking Multiplier – *tracking,* i.e. distance between characters.

Create a new **Composition.** And finally, press **"Generate" button** and get *pre-composition* with full animation of your text in selected *handwriting style* with required *blending mode* and *animation preset* (automatic).

After that, you could **configure this animation:**



Select *Text Color* in **Effects Controls (Fill).**
Drag keyframes of **Time Remap** to change *length of animation.*
Change *Position, Scale, Rotation* and *Opacity* of text in **Transform** options.
Also, for some handwriting styles like **Summer** and **Winter** you could modify special **Slider Control** to change *deep of inscription (on the sand and on the snow).*

If you open *pre-composition,* you will see all characters and could modify them too.

*Please, watch **Animated Handwriting Bundle Video Tutorial** to see exactly how it works!*
