

## Step one

# Getting started

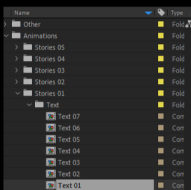

Open file with Stories you want to use.

Inside it you can preview animation by moving blue tracker.

## Step two

# Change text

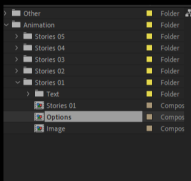

Open Text file inside Text folder.

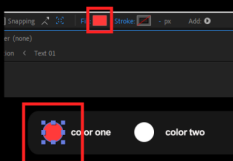

You can use Type tool to change text.

## Step three

# Change color

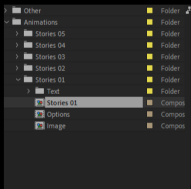

Open options file inside Stories folder.

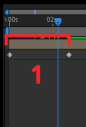

Click on a circle and then on a colored square on top to change color.

## Step four

# Change animation

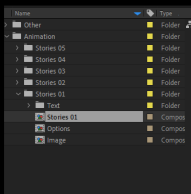

Open main file inside Stories folder.

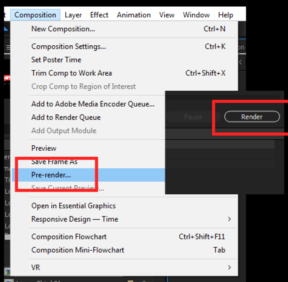

By changing distance between first two rhombuses(1) you will speed up or slow down opening animation.

## Step five

# Export

Open main file inside Stories folder.

Select Pre-render option inside Composition menu. You can change file format and properties by clicking on blue text on the left. Press Render and enjoy the design!
