

## **Thanks for purchasing my template.**

There are some easy tips to customize it.

**1. Change texts/logo •** When you open the project, there's a folder called "02 TEXT/LOGO Placeholders". Inside, there are precomps (eg: title 1, title 2) click on them and change the text and your logo

## **2. Project Controls**

- Inside "01 RENDER ME" composition, There is a layer called "CONTROLS", click on it and in the "effects control" panel you'll see some options to modify the project. You can change Text, clouds and lightning colors, as well as turn on/off cinematic borders

## **If you buy the audio that's in the preview.**

There's a pre-comp inside a project called "03 Place original audio" for especially this audio. If you place the audio file inside, it will play exactly as it is in the preview.
