

## Step 1

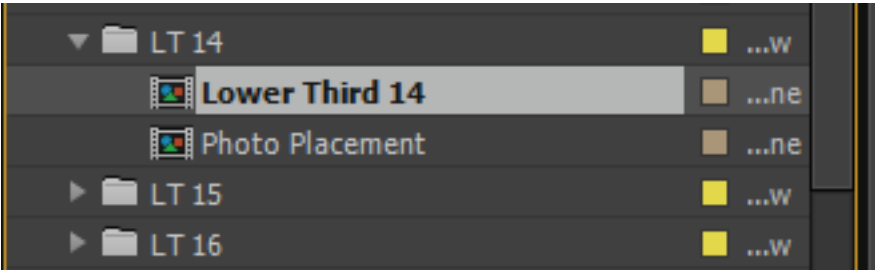

Open "All Preview" comp to see and choose which lower third is your choice.

## Step 2

Open this folder to select and open your desired design.

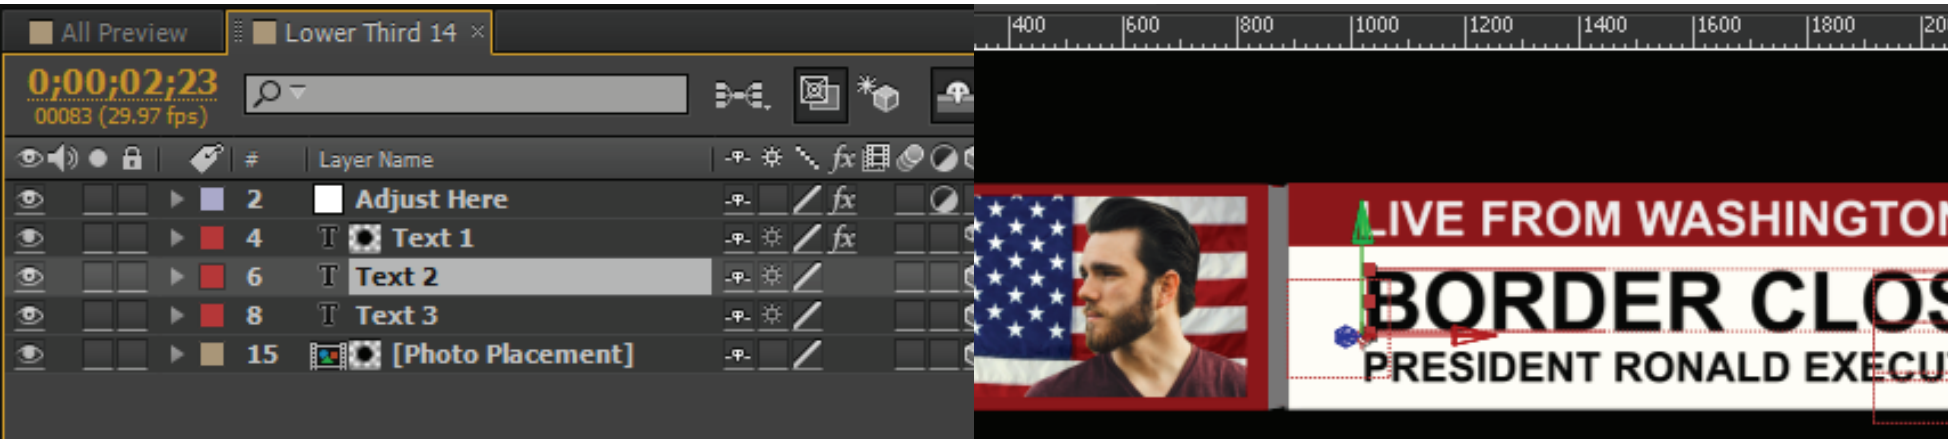

double click the Lower third comp.

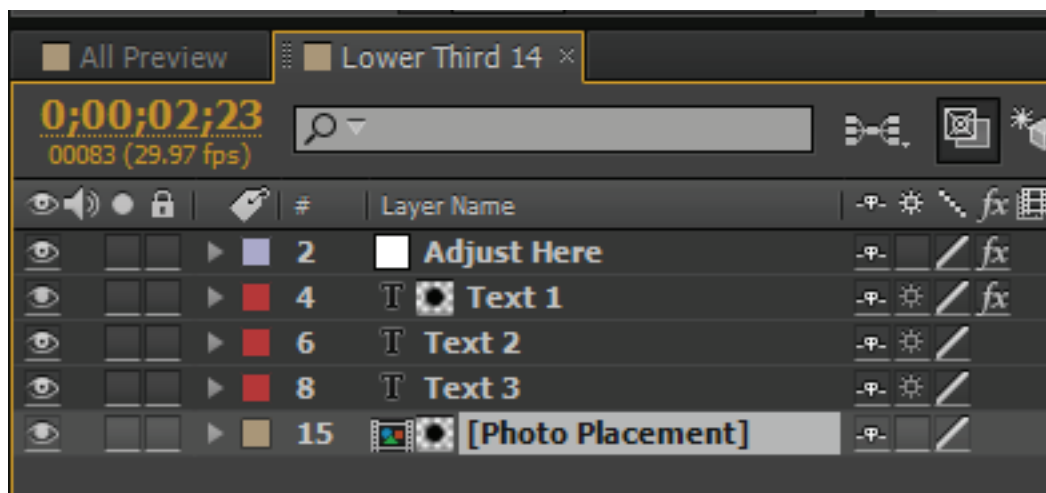

## Step 3

Change or edit your texts. All text is visible in the layers tier for yopu to edit.

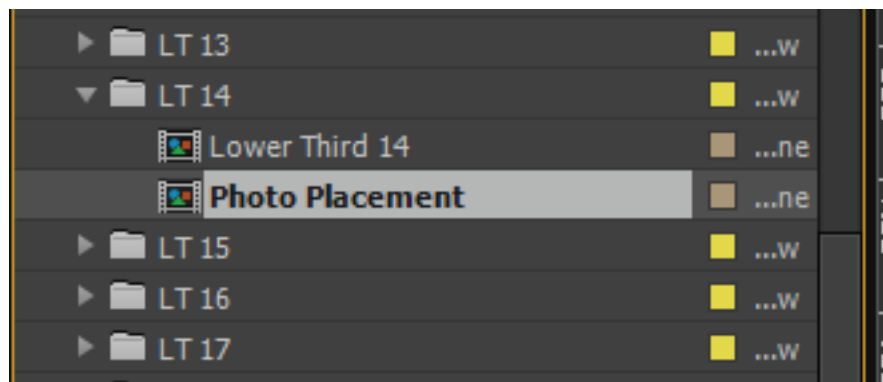

# Step 4

Place your media (photo). Some lower third have the media placements.

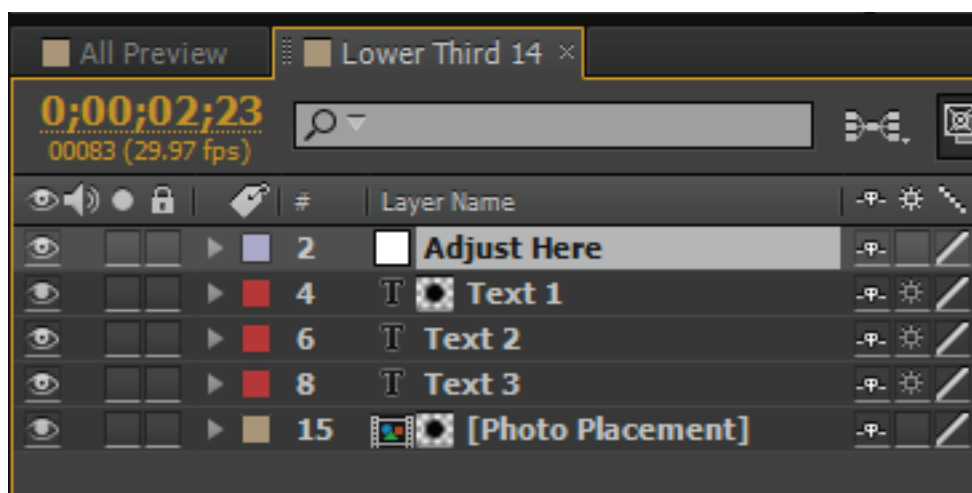

you can open the comp by double clicking this layer.

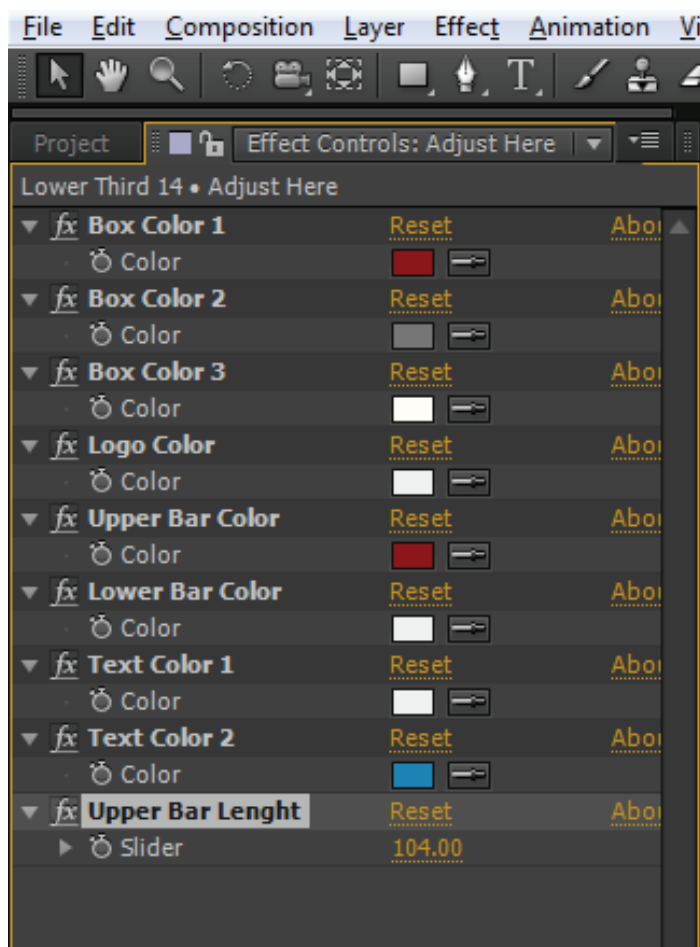

or you can find it in the setting folder of your chosen style.

# Step 5

Adjust or edit the size of elements like the BAR and boxes

select the "Adjust layer"...  
the open the Effects Controls tab by hitting the F3 button on the keyboard.

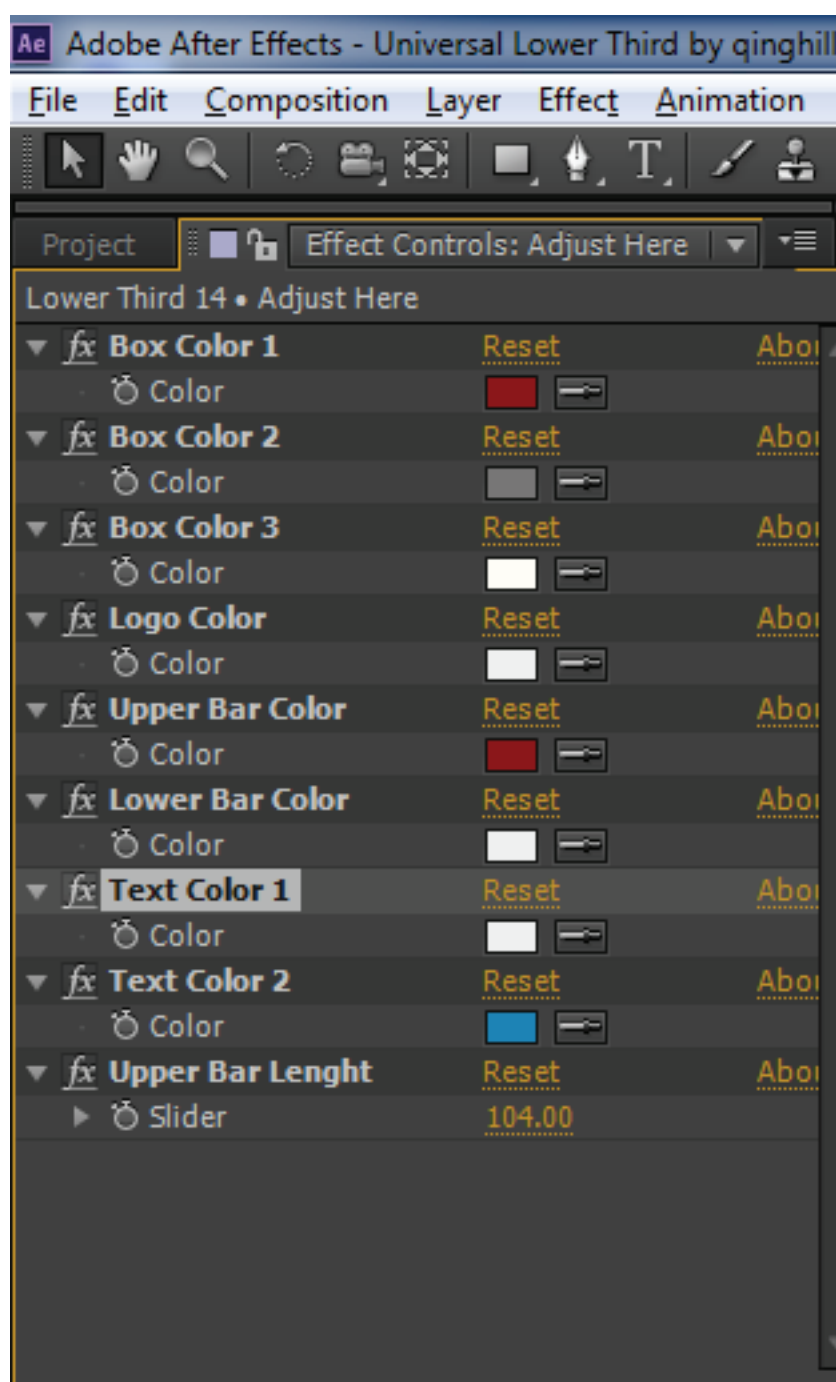

Select this effect and adjust the lenght tou match the lenght of your texts.

# Step 6

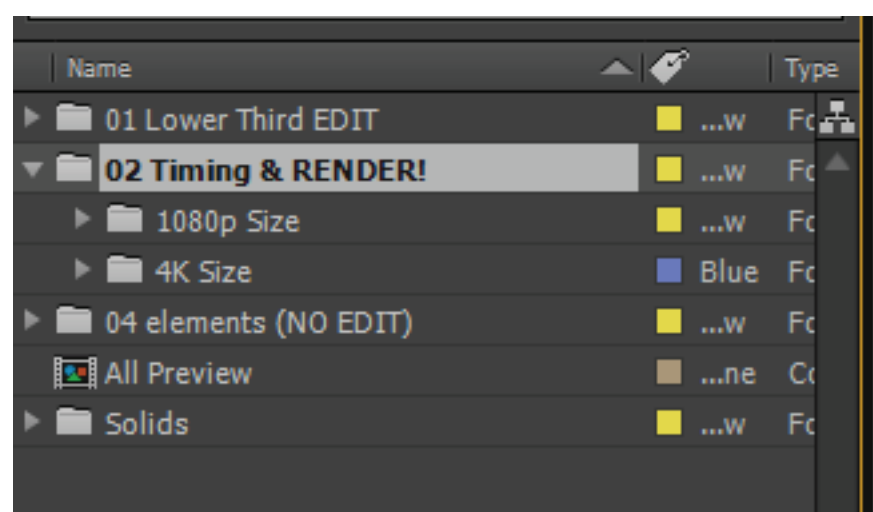

Adjust or edit colors on the same Adjust layer.

All items or elements has been named accordingly for your refferals.

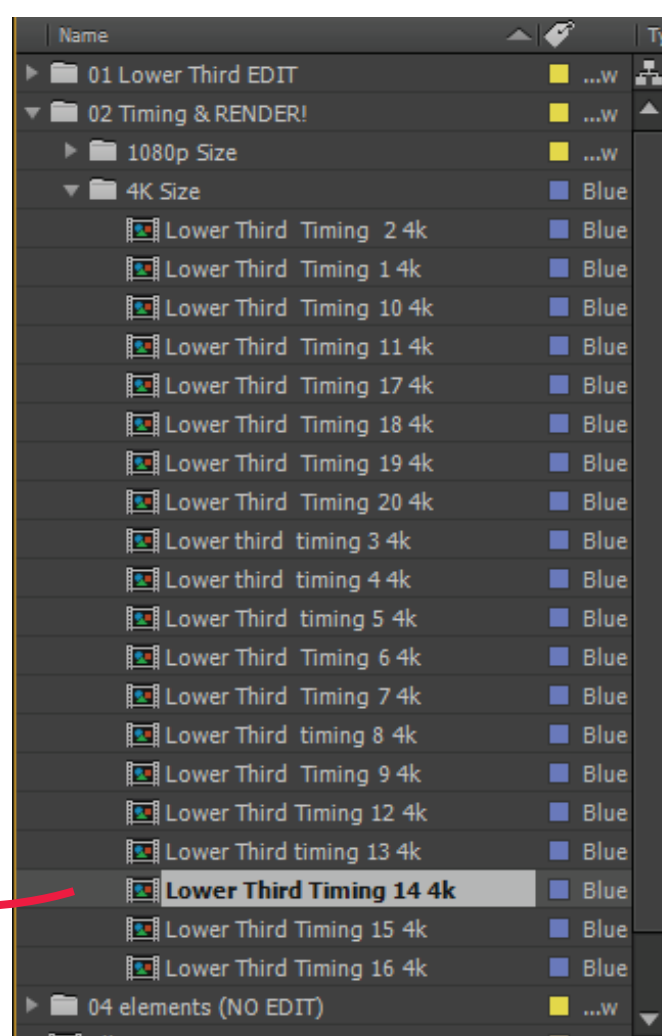

# Step 7

Set the timing of your chosen lower third. After you have done all the settings, open this folder and choose which resolution you want.

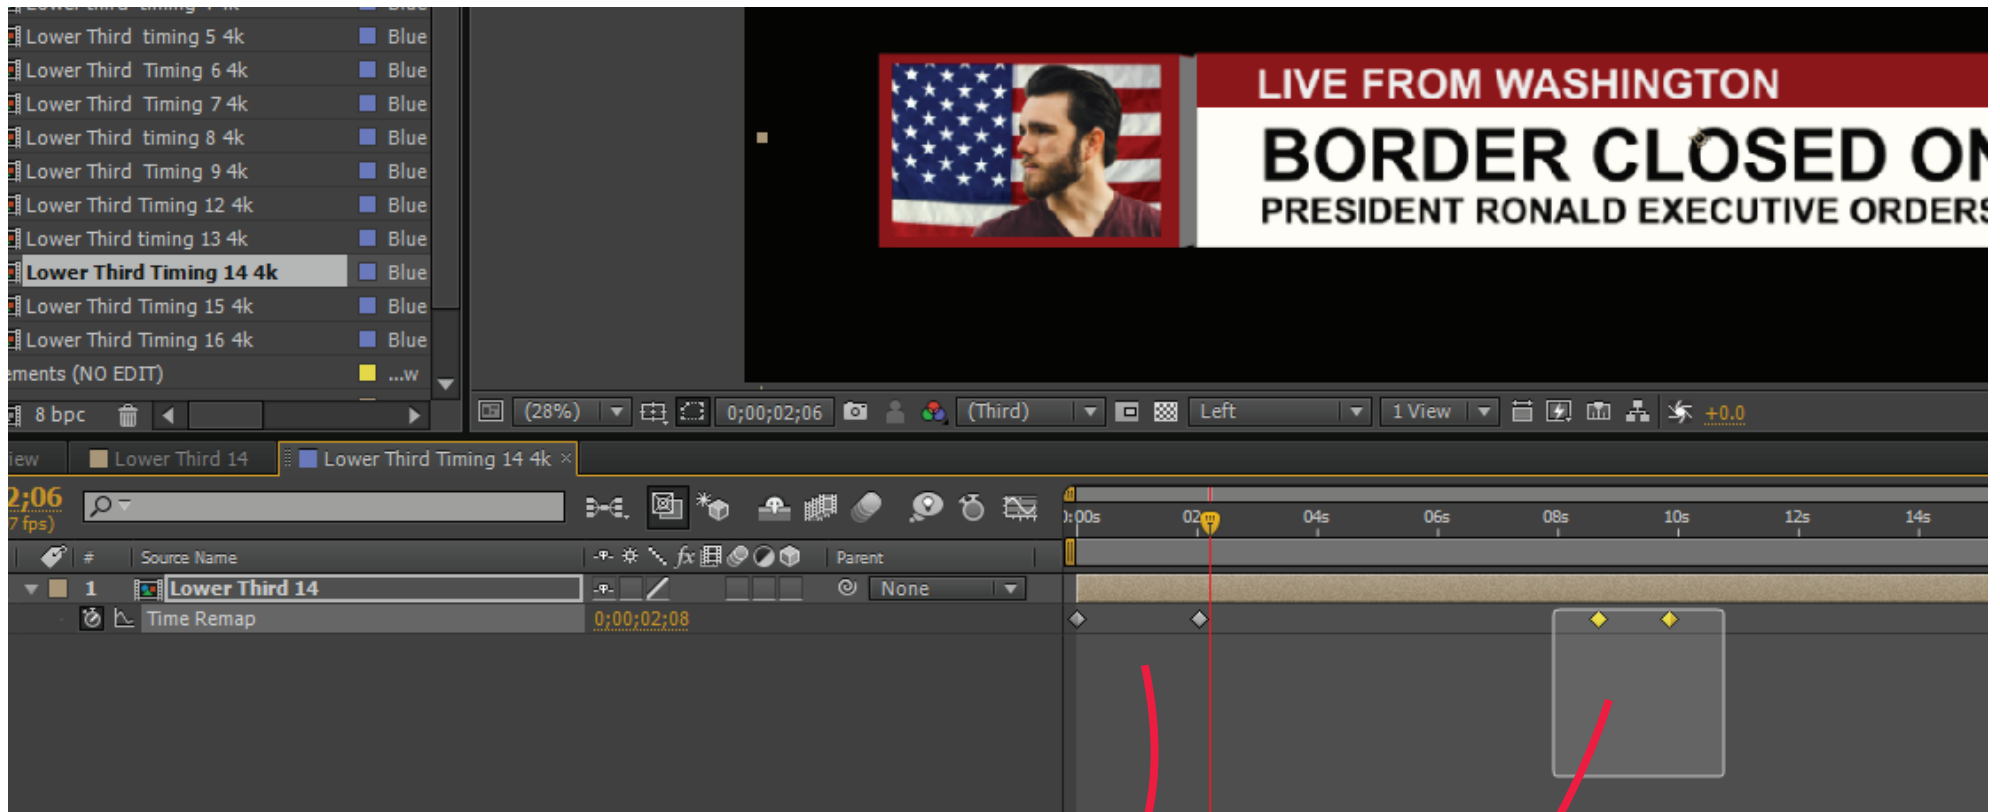

Then choose the lower third number the same as the one you edit before.. (in this case the number 14 and 4k resolution).

Open it..

# Step 7

See the layer have the “Time Remap” effects. (its already appear. If not, drop down the layer property and you will see it.

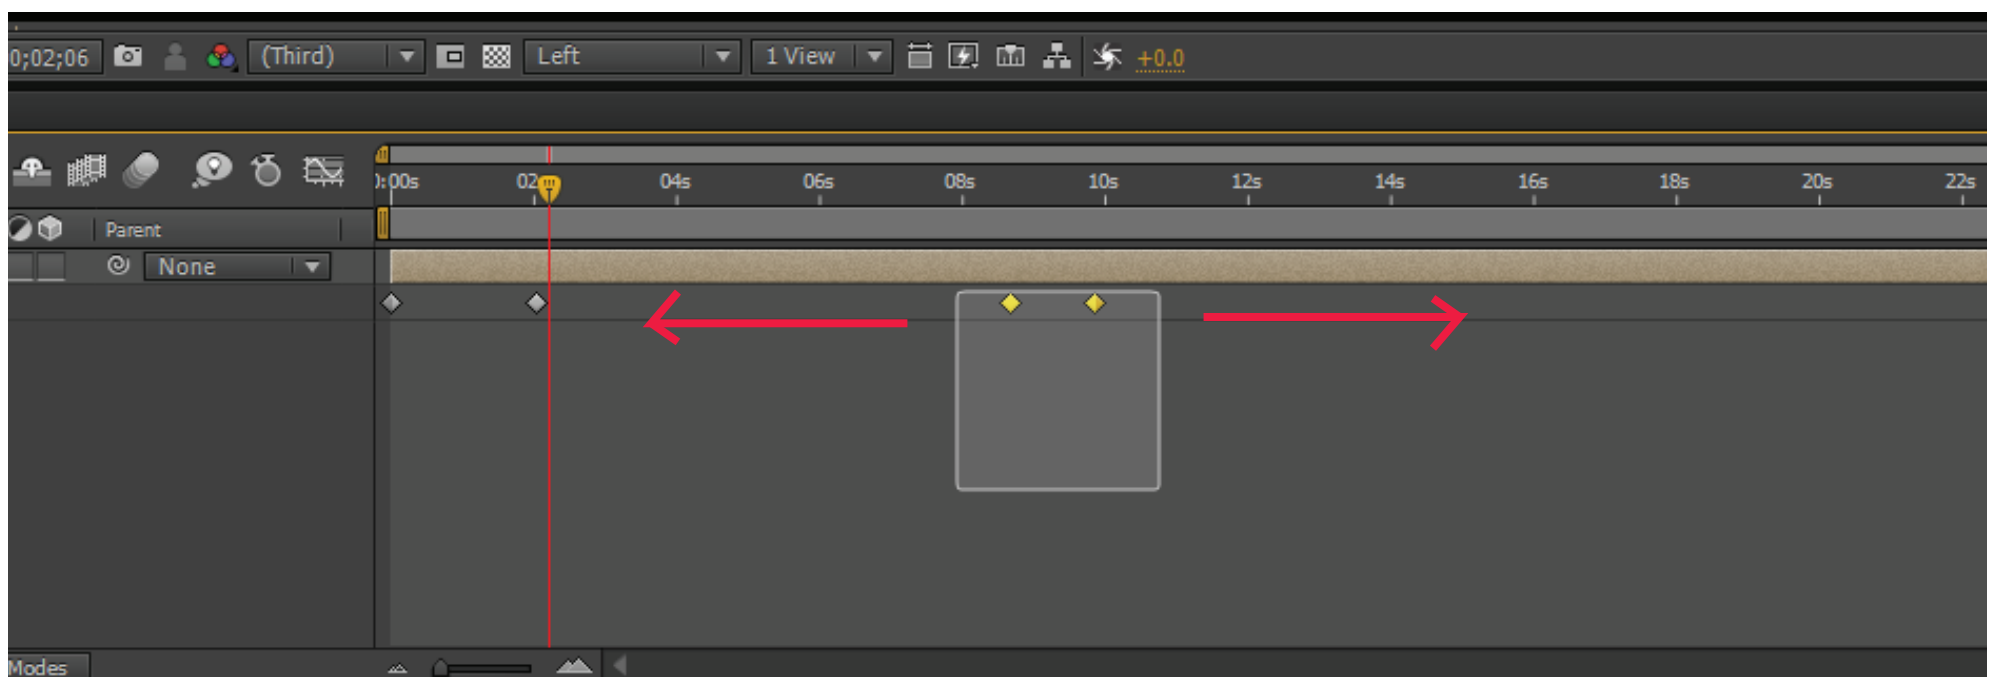

Yo will see there is keyframes on it.

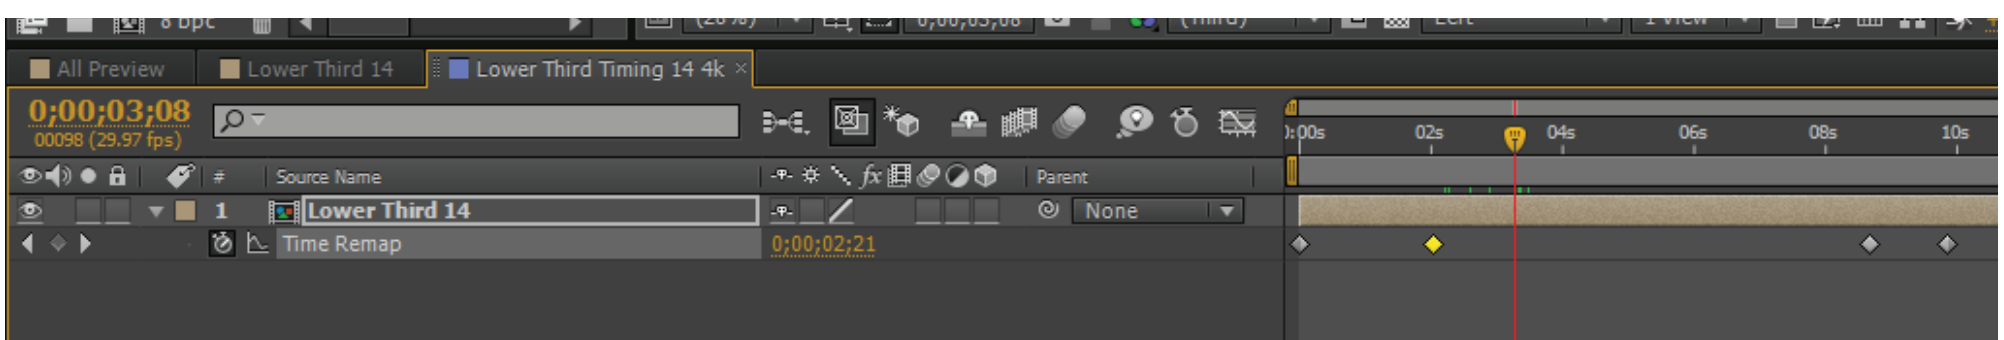

The two key frames in the beginning is the Animation IN

The last two keyframes is the Animation OUT.

If you want to extend the still duration of the lowerthird, just select the OUT keyframes TOGETHER (mouse drag select)

Drag them back or forth accor ding to your needs.

If you wish to speed up or slow down the animation select one keyframe and move it back or forth.
