

# Hello, dear colleagues!

Thanks for buying this template.

## Font Link

You need first download and install the font: [Montserrat](#)

After installing fonts please reopen Adobe Premiere in order to use it

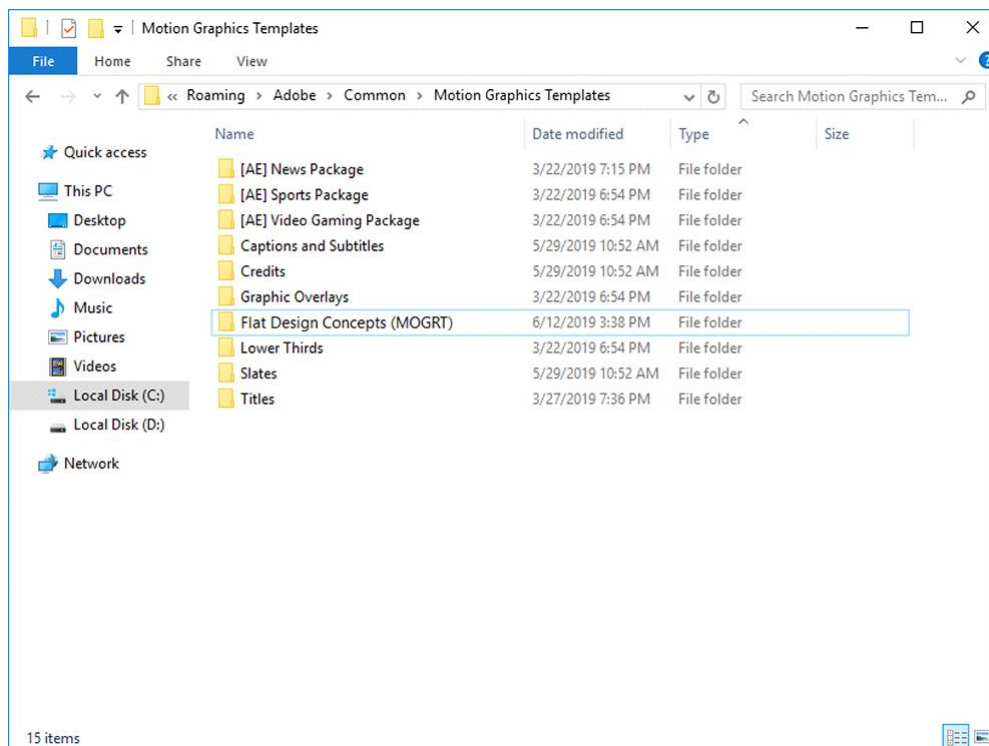

## Essential Graphics

To Install the package please follow these steps:

- 1- Please unzip the file you have downloaded from Envato ( VideoHive)
- 2- Find this folder: **Flat Design Concepts (MOGRT)**
- 3- Copy this folder
- 4- Paste it into this path:

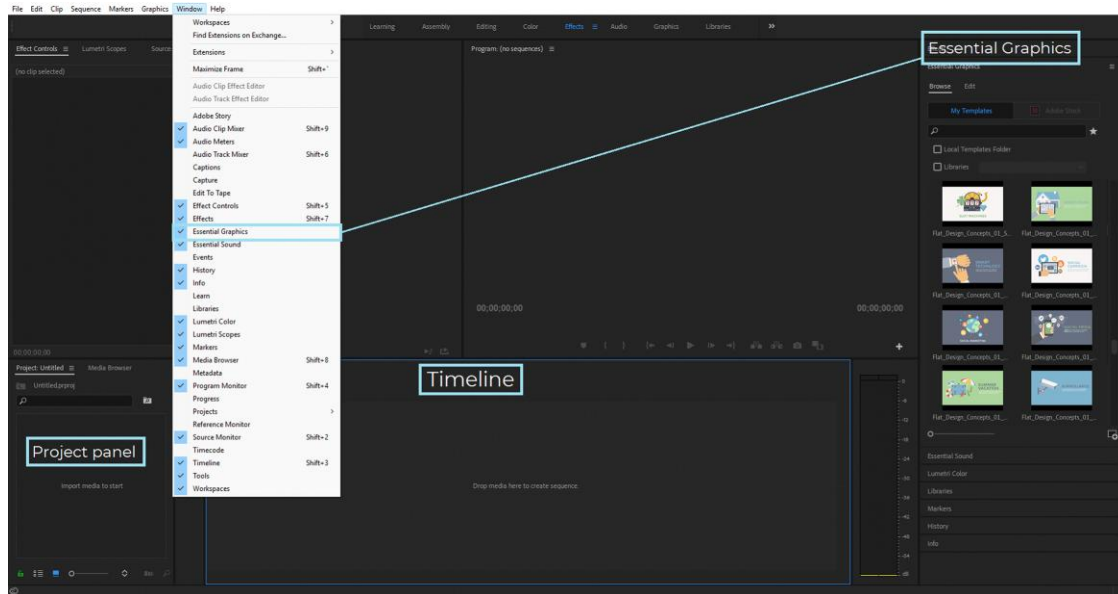

**Windows:** C:\Users\"your username"\AppData\Roaming\Adobe\Common\Motion Graphics Templates

**Mac:** user/"your name"/Library/Application Support/ Adobe/Common/Motion Graphics Templates

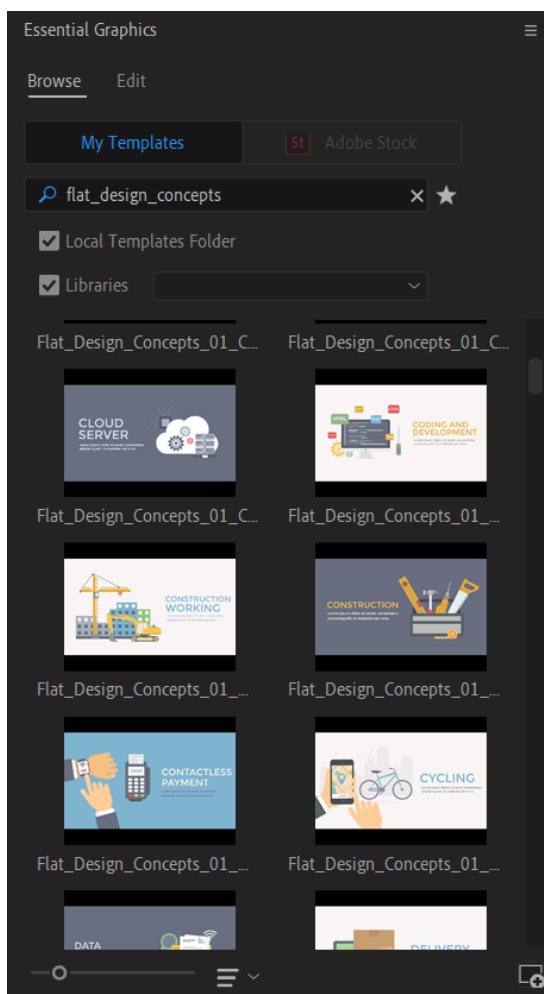

*Mac users, if you can't find the path above please press Shift + Command + G and paste the path above on it ( don't forget to replace "your name" with your name! )*

# The Basics of Premiere

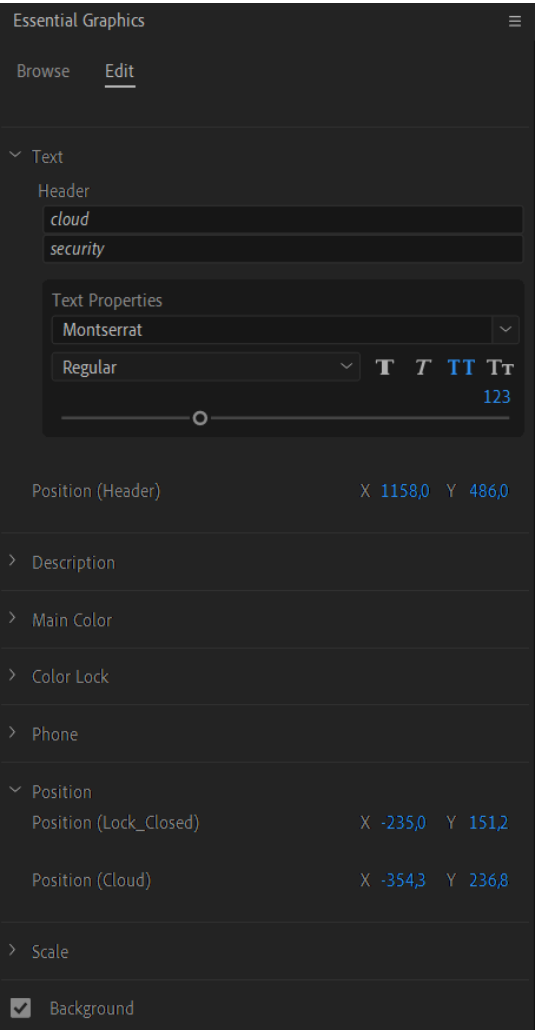

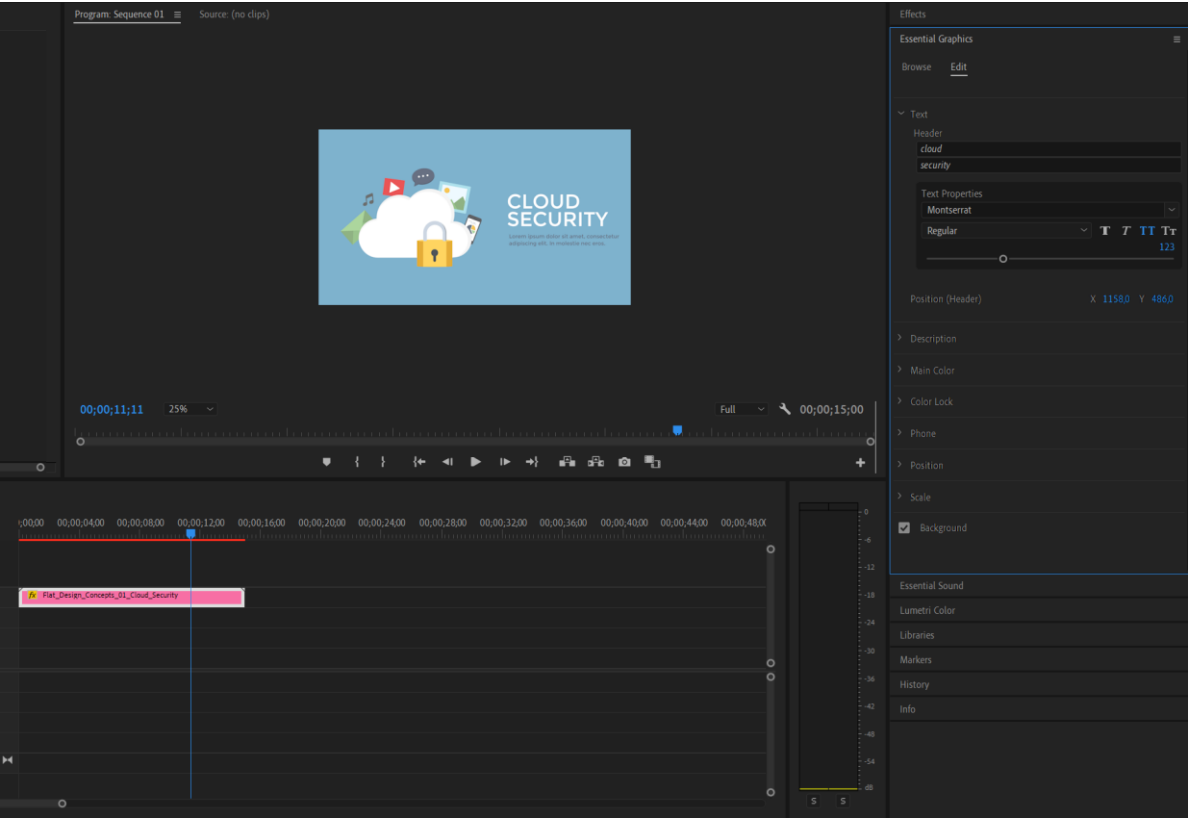

## Finding your scenes

You can find all scenes and elements in the **Essential Graphics** window.

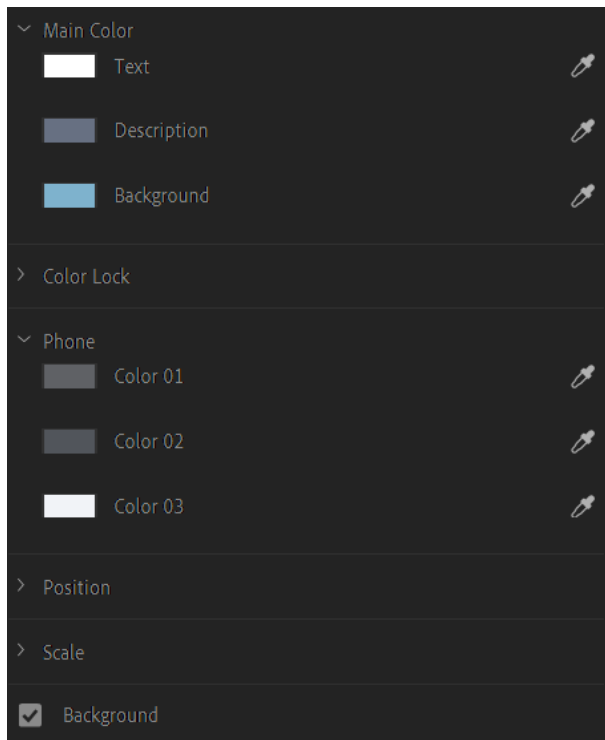

# Customizing Scenes

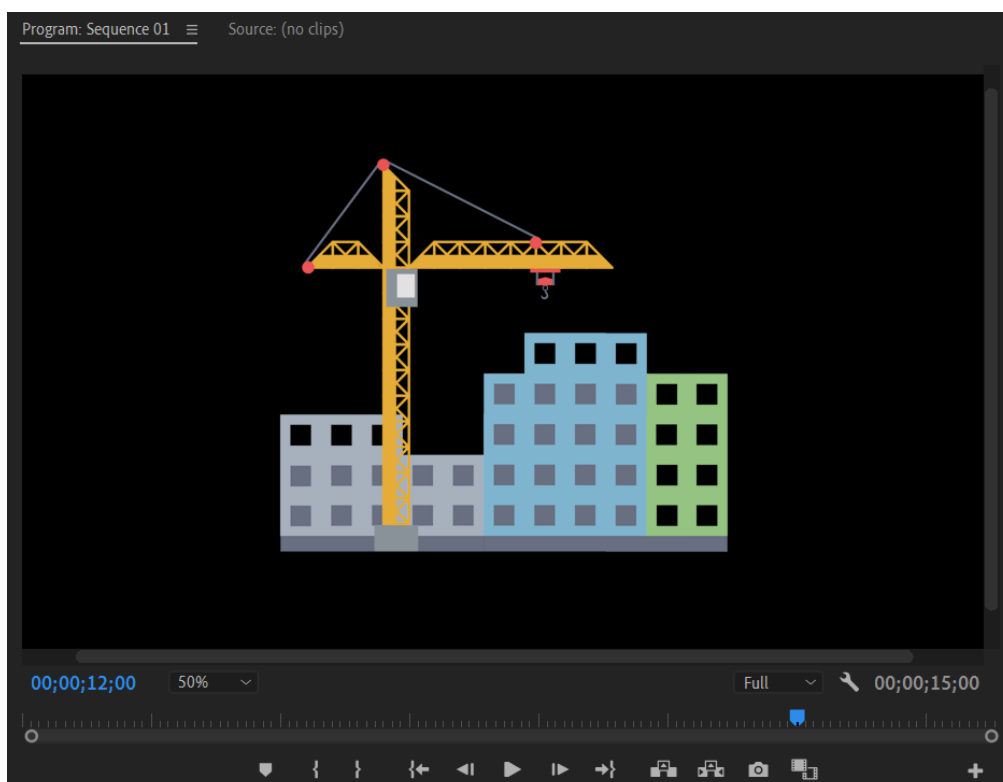

## Color Controlling

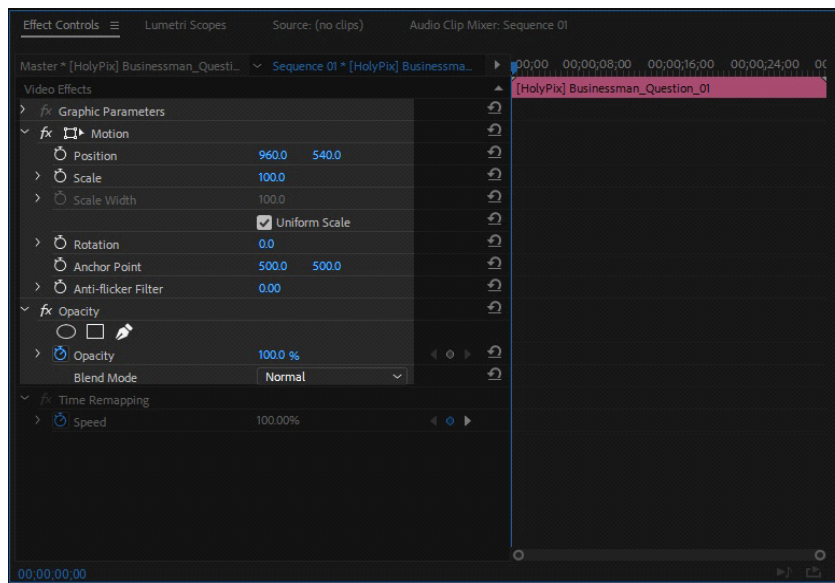

To change the color of the elements you need to select it on the timeline. Available colors will be in the **Essential Graphics** window.

## Native Effects- Scale, Position, Rotation

A double click on the icon will display a selection area. You can rotate the icon, change the size and position of the composition.

If you have questions about the project, send us a mail from our [profile page](#)

**That's all**

**Hope you like it and again - thanks for buying.**
