- music not included

VIDEOHIVE APP

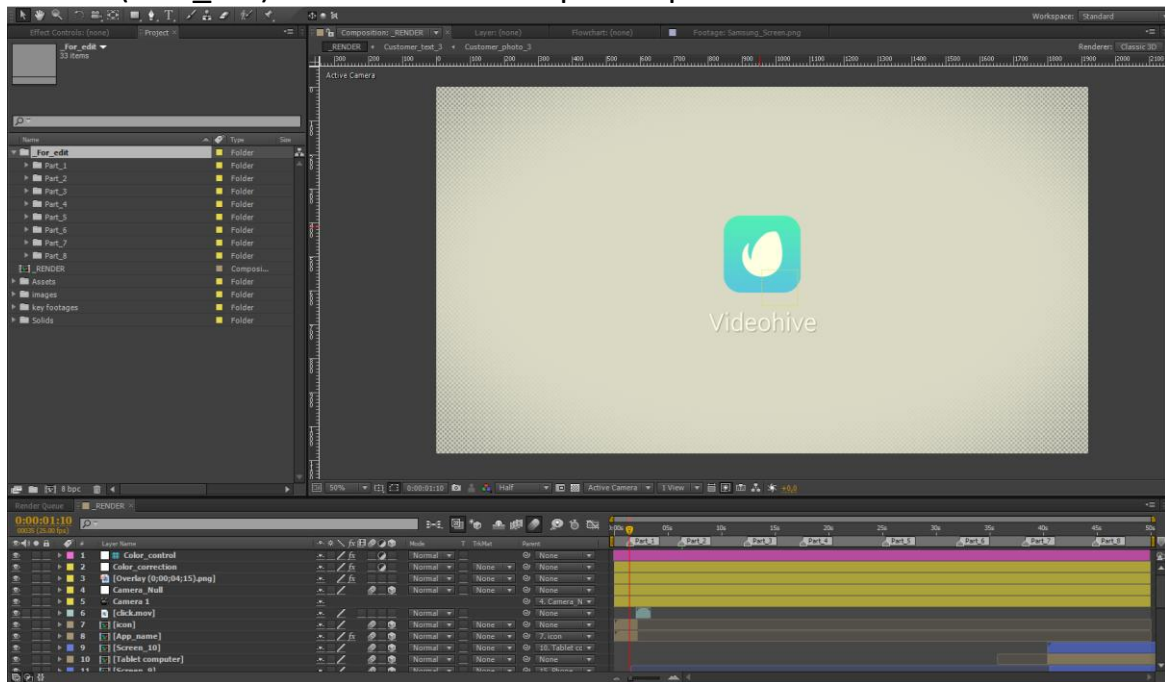

Category: Games
Updated: Dec 11, 2013
Version: 4.0.0
Size: 42.5 MB
Language: English
Seller: Envato Ltd

PRICE: \$0.99

ANDROID APP ON Google play Available on the App Store

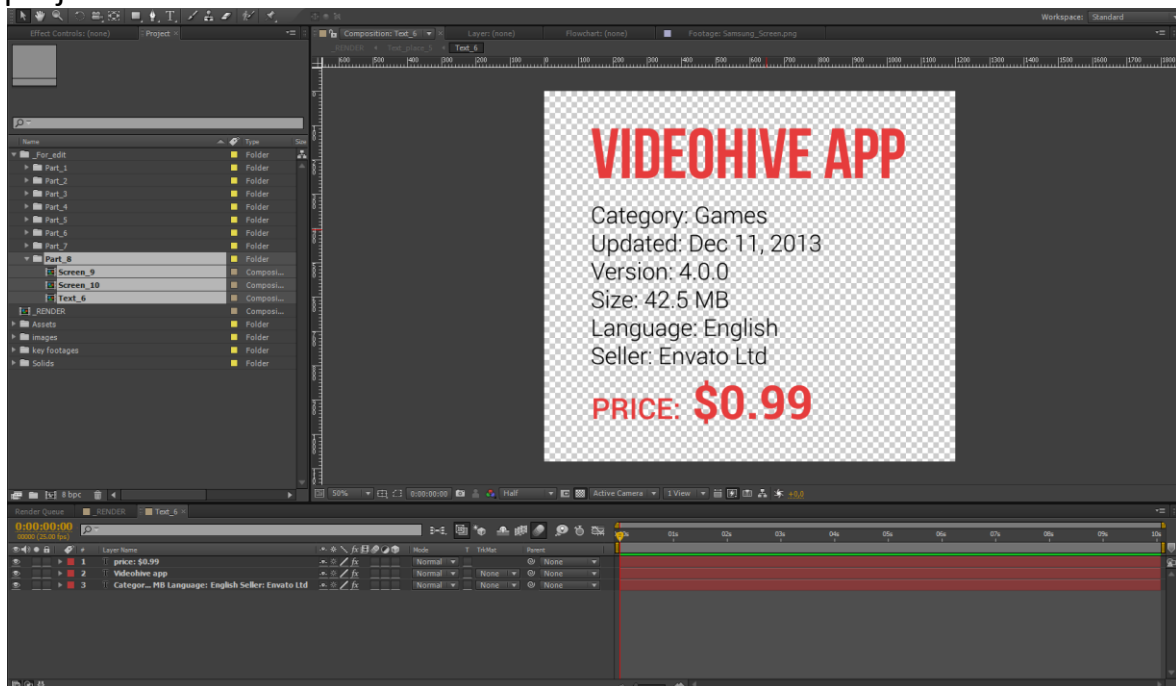

Dear friends! The project very big, but it an ideal order and you without effort will understand it.

1) To edit the project, open the folder "_For_edit". There you will see several folders (Part_1-8). Each folder is a separate part that is marked on the timeline.

For an example we will consider one of them.

2) I selected the last item noted on timeline, as it the most detailed. We expose on timeline a tag at "Part_8" and we open the folder with the same name in a project window.

Farther everything very simply! Open each composition in this folder and you make the changes. Change the text, insert the images. By the same principle you can change other points of the project.

3) The project has very flexible settings of color. To change colors, open composition of " _RENDER " and you will choose "Color control" layer.

Soundtrack you can find here
