

Hello and thanks for purchasing this file. This is a Photo Realistic Logo Mockup Pack in which you get 9 different looking Mockups. This also includes two bonus mockups which you should export as Image for to use.

This file extremely easy to use. All you have to do is import you logo in the LOGO composition and you will see changes in all of your comps directly, straight away😊.

Just drag and drop your logo here and you will see instant changes to all of your comps. You have nothing to do extra and all the files are ready to go.

Thank you
