BeatEdit for After Effects
Installation Instructions

BeatEdit is a ZXP extension. Unfortunately, Adobe discontinued their development of Adobe Extension Manager, which was used to install ZXP extensions. Note that Adobe Extension Manager does not work anymore with CC 2014 or newer! As an alternative, we developed and maintain the *aescripts + aeplugins ZXP installer*. So please install Squash & Stretch using *aescripts + aeplugins ZXP installer* as described here.
