■ Project files

The project has the next files:

01. Help – help text file.

02. Preview Panel – Demo video clips. These clips help you to quickly browse through all the items and choose the one you like.

Preview // Banner Countdown Timers.mp4

03. Working File – Banner Countdown Timers – the folder with main working files. Project has versions with and without start animation. Choose the version and required resolution.

Banner Countdown Timers (4K).aep
Banner Countdown Timers (HD).aep
Banner Countdown Timers (Full HD).aep

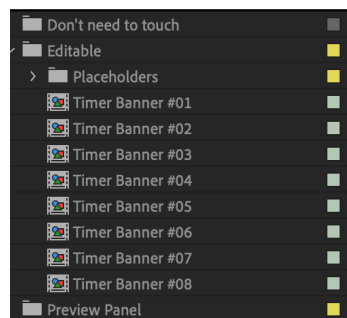

■ Features of the project

1. The project file has 3 folder:

“Don’t need to touch” – ignore this folder;

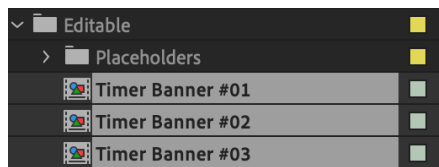

“Editable” – main working folder.

“Preview Panel” – the same as preview clips

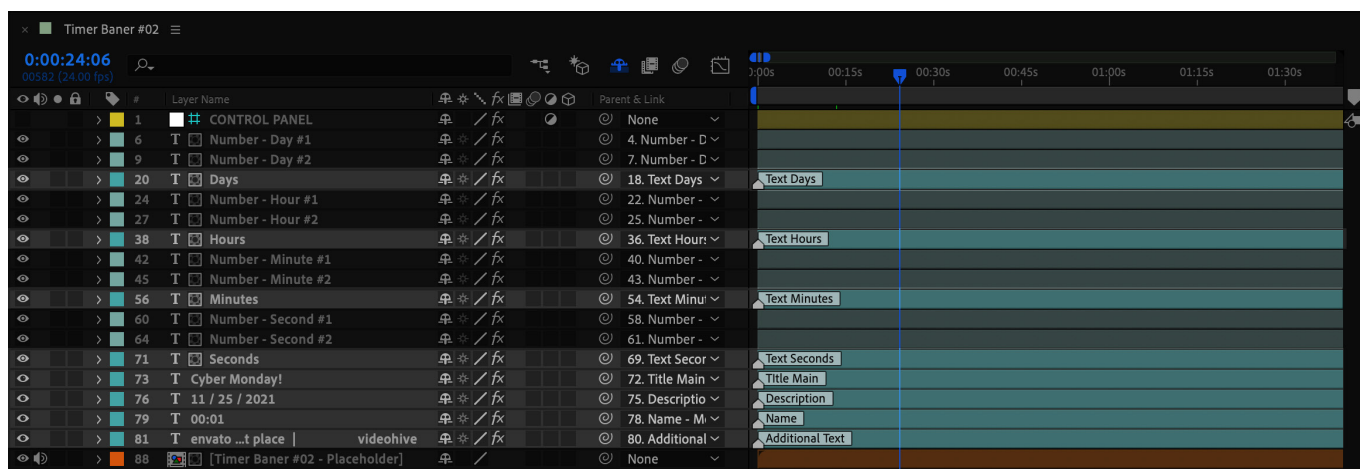

■ How to customize the template

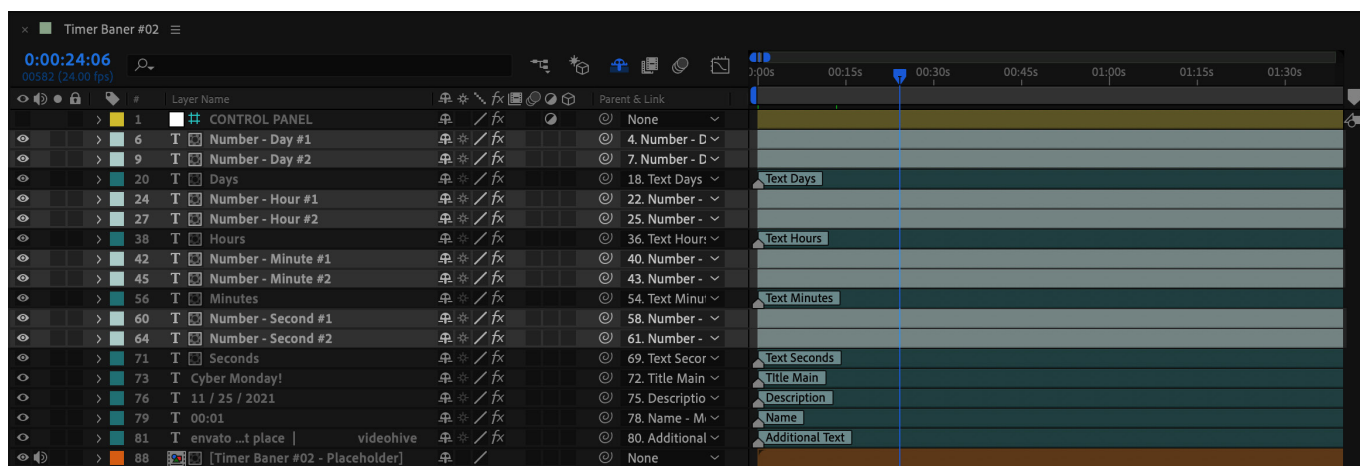

1. Open the "Editable" folder. Open the required composition from "Editable" folder.

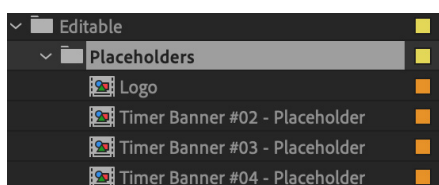

2. Click on the text layers and re-write the text located on the cyan layers.

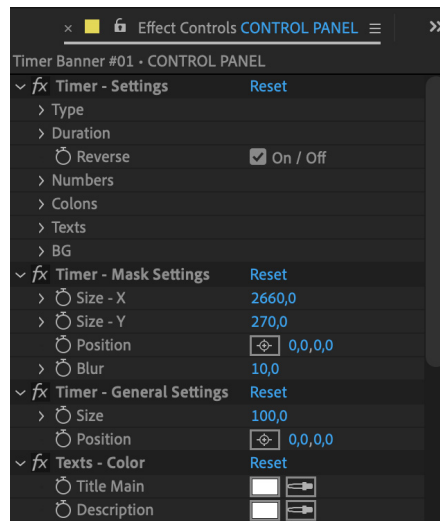

3. The "Number - ..." layers shouldn't be changed, as the value is changed automatically using the control layer (see point 4). BUT if you want to change the font, select all these layers and change the font.

4. Place your footage for BG to the Placeholder composition if you need.

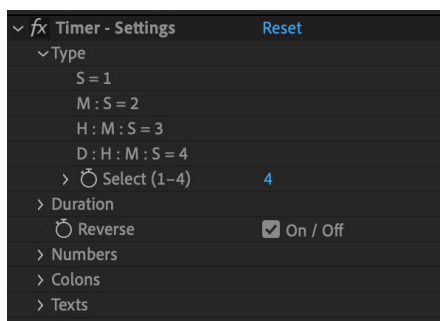

5. You can customize the general settings of composition by clicking on the “CONTROL PANEL” layer. Create as you like.

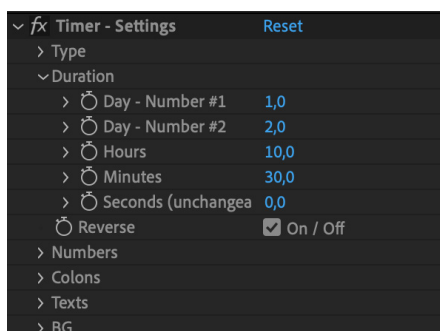

6. To customize the timer settings:

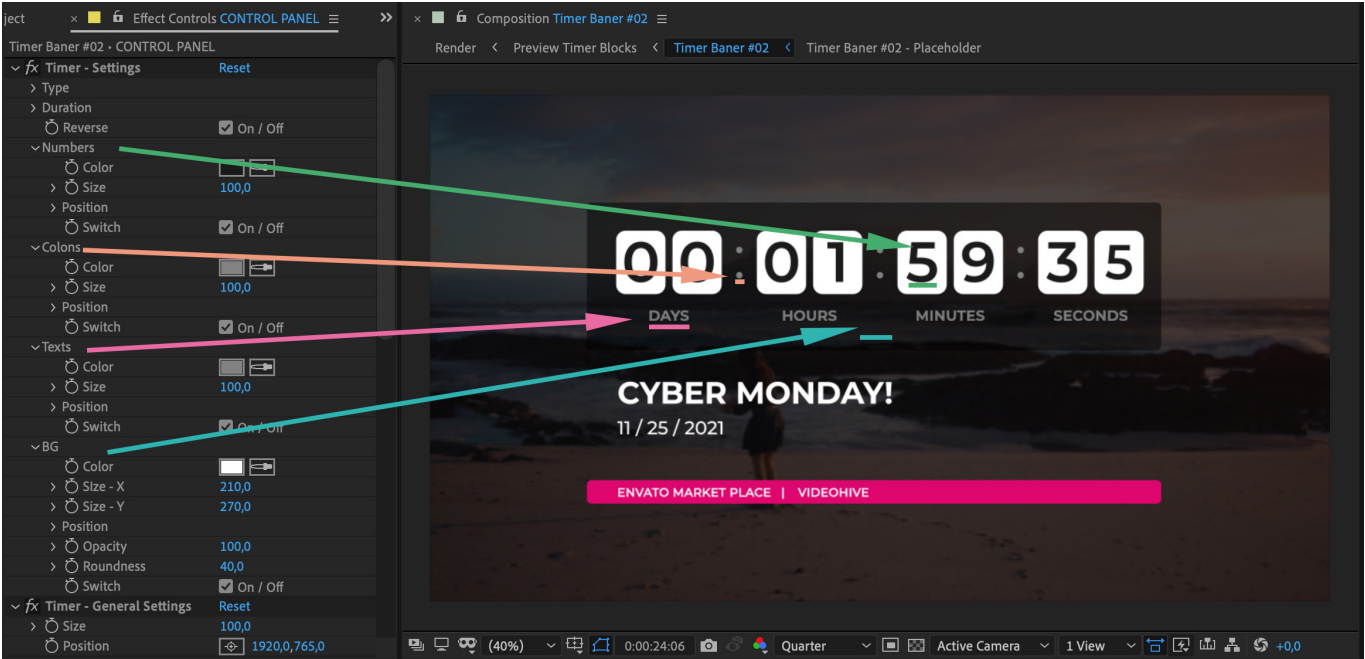

6.1. Choose the type of timer (enter numbers 1, 2, 3 or 4):

6.2. To set the value of timer in the “Duration” menu. Enter numbers. Switch on “Reverse” menu if you want to change the countdown.

6.3. Next - customize the visual style of the block.

That's all!
